Excerpts:

"The Cassadine family was well known around town. Whispers followed them as they walked the school grounds. At the grocery store, you could overhear mothers chatting about Mrs. Cassadine's lack of presence in her children's lives. Teachers were always questioning how one family that was such a social outcast could be so full of knowledge, so intelligent."

"I moved in with Rosalia and her family as soon as they adopted me, I used to be a foster child. I really don't know how my parents died, they were there one minute and gone the next. I was only five when they died. Then when I was seven, the Cassadines came into the picture... Knowing that they were from the same world I was from made me at ease, especially with Sebastian as a protector. Rosalia was a voice of wisdom and I became a nurturer."

"I felt a sharp pair of fangs glide across my neck, down to my shoulder, slowly teasing me until they sunk into my flesh. The pain was unbearable. Everything was moving so quickly, feeling the liquid of venom spread throughout my veins."

"The forest greeted me as I ventured further and further using my night vision to manage my way around in the dark. Once I reached the deeply embedded part where darkness and beauty merged, I felt the presence as quickly as I had arrived. A snap of a twig made me jump slightly. I saw the silhouette emerging from the shadows of the tree, taking care with every powerful stride."

"I eyed both of them, not sure whether they could be trusted right now. With November returning, we were gathering as many allies as possible. The Travin were joining us in battle along with Cassadine soldiers and guards."

Synopsis

After surviving an epic surprise battle with the Rosen Army, the Cassadines prepare to take reign over their kingdom while trying to adjust to life in the mortal realm as young adults. Sebastian, the elder son and soon-to-be crowned king, struggles with managing his everyday “human” life, the forthcoming transition, and serving within the Bliden Tribe, a mysterious society with a nefarious purpose. Little do he and the family know about the impending danger and betrayal they will face from one of their own. Clandestine meetings, covert missions, dangerous relics, and surprising twists and turns put loyalties and relationships to the test as they learn of the faction that wishes to destroy them. The family discovers that they must not only save themselves, but human kind as well.

Excerpts

“I twisted my ring, pondering where my life was going as I began to sneak back into the house; it had to be five in the morning by now. After November had been arrested for her attempted murder on our family, everyone had begun to calm down. With November behind bars it was safer for everyone to roam Travinstein and continue with our lives, preparing for kingdom duties and family matters. My coronation was approaching and I knew once I was crowned it wouldn’t just be known in Travinstein.”

“My entire life has been shaped by my last name. The Building of Emergent housed my future. When I was a teenager, I imagined a world where I didn’t have to rule Travinstein if I didn’t want to, and if I wanted to marry a human, I could. Those were my dreams and in order for me to explore the human world, I would have to somehow become involved in an endeavor that would allow me the freedom to do so.”

“The wind blew by and a gold mist started to form around us...Rosalia held tightly onto my hand. The gold mist swirled from around our hands over Rosalia before disappearing. There was a loud clap of thunder above us and I suddenly saw long black wings extend out from the middle of her back. The gold mist was back skimming the top of the lake, turning it into black water. The wind stopped and her wings wrapped around her, hiding her face and body from me. Small patters of rain began to fall upon us.”

“Sebastian warned me that if I had any thoughts of being deceitful, I wouldn’t be looked at as a Cassadine anymore. I respected that, but I took my chances anyway. Underneath my bed, was a small black box which held the Rosen dagger inside...it was taken in battle landing in a potent mixture of the blood of slain nobles. This transformed the dagger and gave it twisted powers capable of killing anyone who came into contact with it...”

Synopsis

With an impending war at their heels, life for the Cassadines as they know it may come crashing down all around them. Will power plays and politics destroy their kingdom and their family? Will their legacy be able to prevail and ultimately triumph, sparing the citizens of Travinstein, as well as the mortal world from a reign of darkness? Join the Cassadines in their final stand against the Rosens and experience the harrowing events that abound as you become immersed in this epic tale.:

Excerpts

“We silenced ourselves by listening. There wasn’t any noise. No birds, no squirrels, no other creatures, no wind blowing or rustling of trees. I felt shivers going up my spine and throughout my body. Don’t do it Trey. Don’t do it. Daniel isn’t even here to talk you out of it.... It was Haven’s voice in my head. Somewhere her thoughts floated into my mind. I looked around wide eyed and scared. Haven and Trey were here somewhere. ‘Marcus!’ I roused. It’s going to blow up.... Marcus! I grabbed at his arm... Before I could utter another word, there was an explosion from the back of the house.”

“The moment I was out the front door, there was a jolting feeling in my chest. I lurched forward holding onto the stone wall. I reached under my shirt to feel my heartbeat and I felt warm liquid seeping from my skin. I looked through my shirt to see a small, bleeding, cut. I had broken an unknown binding. Sebastian trusted me and I had walked away.”

“Smiling, I soaked in the moonlight. The air was cool outside and refreshing. My view of Travinstein was beautiful. Feeling compelled, I climbed up on my balcony and stood at the very edge of the railings testing my balance. The thrill of knowing that at any given time I could fall to my death made me giggle.”

“We had found a lot of information about the Order of the Dragon. It was a secret society, it did indeed consist of witches and wizards, and they did protect the vampire nation centuries ago. They were considered neither evil nor noble, they were a neutral party. They stayed close to those in their group and worked alongside anyone who gave them a generous payment and had a cause that they believed in.”

“I kept going forward. There was no way she was getting the pocket watch, it was way too important to Sebastian. If the family’s fate relied on the pocket watch, I wasn’t going to be the one to let it slip away. There was a rumble underneath us as I tried to ascend as fast as I could. I almost made it to the surface when a whirlpool and a swirl of sand and particles pushed me backward. Bursting through it was a kelpie...As I spun myself around to leave, the kelpie rammed into my side before using its teeth to grab at my tail and drag me backward. I struggled for release and felt a sharp stab in my spine...My strength slowly began to fade while I thrashed in the water desperately trying to escape...I drifted in and out of conscious.... Warmth covered me but quickly evaporated as I was plunged into the abyss of the waters... The last thing I saw were the green fireworks exploding in the sky.”

About the Author

Teen phenom, Dasia Zanders has been putting pen to paper since she was very young and began working on her first novel at the age of twelve. Now, after honing her writing skills through her pivotal adolescent years, she has completed the first two volumes of her trilogy of work about the Cassadine Clan.

Her first novel, *The Cassadine Conception*, introduces us to a very special group of supernatural teens who live double lives in the human and immortal realms. In the *Cassadine Dagger and Ring*, Sebastian, Rosalia and Elizabeth, struggle with finding themselves and their place in two worlds as they learn to become leaders and discover how things and others aren't always as they seem as turmoil unfolds around them.

Dasia's novels have already earned their rightful place on the shelves of public and high school libraries. They continue to be added to teen / young adult collections across the country and their popularity continues to grow with the anticipated 2017 release of the final installment of her trilogy.

Based upon her everyday experiences, Zanders' characters are compelling, soulful and relatable. Just like their creator, they're not your average teens next door. You're invited to come and step into her spellbinding world where modern life meets an ancient kingdom and magic, intrigue, romance, and treachery abound.

Dasia currently resides in the Orlando, FL area. Though she is now starting her first year of college, she continues to write daily drawing inspiration from the people, places, the natural beauty, and conversely, the darkness that surrounds her.
